EDUCATION

- **Technocrats Institute of Technology, Bhopal** 2017 – 2021
Bachelor of Technology in Information Technology | CGPA: 8.64 Graduated June 2021

EXPERIENCE

- **Manifest Global (Cialfo)** Noida, India
Software Engineering Lead Aug 2026 – Present
Cialfo is a Series B EdTech SaaS platform (\$77M raised) serving 310,000+ students and 1,000+ universities across 105+ countries.
 - **Technical Leadership:** Promoted to Lead for expanding the agentic platform beyond its original scope; own end-to-end delivery of business-critical projects across Product, Design, Business, and QA, accountable for timelines and engineering quality.
 - **UI Ownership & AI Direction:** Own the UI repository end-to-end and drive the company's AI initiatives, setting technical direction across UI and agentic surfaces while contributing across all repos via AI-assisted workflows.
 - **Automated Evaluation Framework:** Built a Claude Code quality framework spanning the UI, agentic, and API repos, benchmarking each against 130 questions plus follow-ups and auto-remediating failures until a 100% pass rate.
 - **Agentic Chat & Internal Tooling:** Lead the agentic chat experience from interaction design to production reliability, and build internal developer tools applied across the UI to accelerate delivery.
- **Manifest Global (Cialfo)** Noida, India
Senior Software Engineer Apr 2025 – Aug 2026
 - **Agentic AI Workflows:** Architected Claude-powered agentic pipelines letting PMs and designers (3–5 non-engineers) ship production-ready prototypes independently, cutting prototype-to-review from days to hours and lifting delivery velocity by ~75%.
 - **Claude Code Skill Authoring:** Wrote and iteratively optimized Claude Code skills; owned the end-to-end skill library powering the no-dev workflow platform for autonomous feature delivery.
 - **Developer Infrastructure:** Built pre-commit hooks and automated validation gates enabling non-developer contributions to production codebases with CI/CD compliance at scale.
 - **AI-powered Chatbot Platform:** Delivered multi-brand production AI chatbot features on Cloudflare Workers with Cloudflare-managed RAG and tool integrations, including brand-specific config and workflow isolation.
 - **Frontend Performance:** Drove a ~30% Page Load Time reduction and LCP gains through Web Vitals profiling, lazy loading, and asset pipeline refactoring.
- **Manifest Global (Cialfo)** Noida, India
Frontend Engineer Jul 2023 – Apr 2025
 - **Product Ownership:** Independently owned multiple frontend projects; worked directly with PMs and Designers to define MVP scope, shape product direction, and demo to leadership.
 - **Cloudflare Workers Platform:** Designed and deployed serverless APIs with Cloudflare Workers and Wrangler, integrating CRM workflows and AI-assisted responses into production flows.
 - **UI Systems & Analytics:** Built a scalable component library in Angular, Tailwind CSS, and Angular Material; added Segment event tracking for data-driven product decisions.
- **MAQ Software** Noida, India
Software Engineer – Frontend May 2022 – Jun 2023
 - **Angular Expertise:** Built scalable, production-grade Angular applications for enterprise clients with modular architecture and Angular best practices.
 - **Testing & Quality:** Authored Jasmine/Karma unit tests at 91%+ coverage as a mandatory QA gate; treated test quality as a first-class engineering concern.
- **Accenture** India
Application Development Associate Jul 2021 – Mar 2022
 - **Frontend Foundations:** Contributed to enterprise-scale Angular applications, building practices in component design, code reviews, and Agile delivery.

SKILLS

- **Frontend:** Angular (expert), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Angular Material, RxJS, FontAwesome
- **Backend / Cloud:** Cloudflare Workers, Wrangler, Serverless API Design
- **AI & Agentic Systems:** Claude Code skill authoring, LangChain, LangGraph, agentic workflow design, no-dev pipeline architecture, Cloudflare-managed RAG & tool integrations
- **Testing & Analytics:** Jasmine, Karma, Jest, Unit Testing (91%+ coverage), LLM Evals, Segment (frontend event tracking)
- **Practices:** Frontend system design, Web Vitals / performance optimization (PLT, LCP), pre-commit infrastructure, Agile delivery
